Tools for Creating Transcripts from Audio Recording

Often we need to create transcripts from existing audio files. This note will provide a list of tools that can be used with various degrees of success.

AI AGENTS HAVEN'T YET REVIEWED THIS NOTE!

TurboScribe - transcribes audio & video to text with AI-powered accuracy.

TurboScribe is an AI-powered transcription service that converts audio and video files into text with high accuracy. It supports over 98 languages and offers built-in translation to more than 134 languages. Users can upload files up to 10 hours long (or 5 GB) and receive transcriptions in seconds. The service includes features like speaker recognition and ensures data privacy with encrypted storage. TurboScribe offers a free plan with three daily transcriptions (up to 30 minutes each) and an unlimited plan at $10 per month (billed annually) or $20 monthly.
